

## Cooling Tower Treatment

- Legionella prevention in cooling systems requires the use of a biocide whose concentration should be kept constant along the water circuit.
- The PH should also be kept under control (in order to prevent from corrosion or improving the biocide performance) as well as the electrical conductivity.

**IITC Products:** WTR Pro PH-Cl, Dositec, Lector, Chloride Sensor.

**WATER PRO PH  
CONTROLLER**

**DOSITEC  
DOSING PUMP**

**LECTOR  
CONTROLLER**

**CONTROLLER 3000**
